Chrome

1. Within Chrome, locate the **Options icon** to the far right of the address bar and click it. From the resulting drop-down menu select **Settings**.
2. In the **Settings** tab, scroll down to the bottom of the window and click **Show advanced settings**.
3. Scroll down the window and locate the **Privacy** heading and click the **Content settings** button.

4. In the Content settings window, locate the Pop-ups heading.

   Pop-ups
   - Allow all sites to show pop-ups
   - Do not allow any site to show pop-ups (recommended)

5. In the new **Add a new hostname pattern** field, type `[*.]skillport.com` and then push "Enter" on your keyboard. Please repeat the same steps to also add `[*.]skillwsa.com` and
6. After both sites have been successfully added, you may exit the window by clicking on the **OK** button.
7. Please click on the **OK** button again, to return to the main web browser window. You may now close the **Settings** tab.
